“La collezione Pan è la nostra interpretazione della tipologia essenziale cilindrica del monocomando, che partendo da archetipi classici sviluppa estetiche e nuove tipologie completamente originali. Ci siamo concentrati sul raccordo tra gli elementi verticali ed orizzontali: come in natura non esistono tagli e saldature, così dal corpo del nostro rubinetto, pensato come il tronco di un albero, hanno origine la bocca erogatrice e la manopola, attraverso un raccordo dolce, progettato esattamente con la stessa logica non traumatica dell’innesto tronco/ramo.”

“The Pan collection is our interpretation of the spare, cylindrical type of single lever mixer, which uses classical archetypes to develop aesthetics and new, completely original styles. We focused on connecting the vertical and horizontal elements. As in nature there are no cuts and welds, so the body of our faucet, designed like the trunk of a tree, creates the spout and the handle, using a gentle connection that is designed with exactly the same delicacy one would use in grafting a branch to a tree trunk.”

L'ambiente bagno da noi concepito è uno spazio architettonico che ha le stesse qualità di finiture e di arredo degli altri ambienti della casa. Per questo i rubinetti sono progettati come piccole sculture, oggetti dalla forte personalità sia visiva che tattile.

The bathroom we have designed is an architectural space with the same trims and furnishings as other rooms in the house. For this reason, the faucets are designed as small sculptures, objects with both a strong visual and tactile personality.

La salle de bains que nous avons conçue est un espace architectural dont les qualités de finition et de décoration sont les mêmes que celles des autres pièces de l'intérieur. C'est pour cette raison que les robinets ont été conçus comme de petites sculptures, des objets à la forte personnalité, aussi bien visuelle que tactile.

Der von uns konzipierte Baderaum ist ein architektonischer Raum, der über dieselben Ausführungs- und Einrichtungsqualitäten verfügt wie die übrigen Räumlichkeiten in einem Heim. Aus diesem Grunde sind die Wasserhähne als kleine Skulpturen entworfen, bei denen es sich um Gegenstände mit einer starken sowohl visuellen als auch taktilen Persönlichkeit handelt.

El ambiente baño concebido por nosotros es un espacio arquitectónico que tiene las mismas cualidades en cuanto a acabados y decoración con los demás ambientes de la casa. Por esto los grifos son proyectados como pequeñas esculturas, objetos de fuerte personalidad tanto visual como táctil.

“La collection Pan représente notre interprétation de la typologie cylindrique essentielle du mitigeur qui, partant d'archétypes classiques, développe des esthétiques et de nouvelles typologies absolument originales. Nous nous sommes concentrés sur le raccord entre les éléments verticaux et ceux horizontaux. Comme dans la nature, il ne présente aucune coupure ni aucune soudure; ainsi, du tronc de notre robinet, pensé comme le tronc d'un arbre, partent le bec et la poignée, à travers un raccord doux, conçu avec la même logique, non traumatisante, que celle de la greffe tronc/branche.”

“Die Kollektion Pan entspricht unserer Interpretation der wesentlichen zylinderförmigen Typologie des Einhebelmischers, welche von klassischen Archetypen ausgehend eine originelle Ästhetik sowie neue Typologien entwickelt. Wir haben uns auf die “Verbindung” zwischen den senkrechten und waagerechten Elementen konzentriert: gibt es in der Natur keine Schnitte oder Schweißstellen, so gehen aus dem Körper unserer Armatur, die wie ein Baumstamm gedacht ist, der Wasserauslauf und der Griff über eine sanfte Verbindung hervor, entworfen mit der gleichen untraumatischen Logik des Übergangs Ast-Baumstamm.”
